

synomax

Dogs show joint pain by changes in their movement. SYNOMAX is for those owners who want their dogs to be active again. Therefore, they intend to help in any possible way to mitigate the symptoms or prevent them.

Joint problem is the most common illness affecting dog's quality of life.

Increased level of physical activity, injuries, overweight, arthrosis due to aging or bone development disorders (such as hip or elbow dysplasia) can lead to severe damage of joints. It usually appears over the age of 7, but can occur at any age.

- It affects **almost 20% of adult dogs, and 80% of senior dogs**
- It causes restrictions in their physical activity and **constant pain**
- In the majority of cases it **requires lifelong medical attention**

80% 
of geriatric dogs*
have osteoarthritis

*older than 8 years

synomax

Veterinarians believe that the number of dogs being treated for joint problems constantly increases, because:

- the majority of **popular breeds** are prone to joint disorders,
- dogs have a longer life span, **(increased by 25% over the past 10 years)**
- **owners** are more willing to take care of their aging pets and to **pay the costs of medical treatment.**

Pets are living longer and subsequently developing age-related problems

The likelihood of osteoarthritis in dog breeds:

Very high	Medium	High	Low
German Shepard	Basset Hound	Old English Sheep dog	Shih Tzu
Labrador Retriever	Standard Schnauzer	American Cocker Spaniel	Pug
Rottweiler	Bulldog	French Poodle	Collie
Great Dane	Maltese Terrier	Mini Poodle	Beagle
Golden Retriever	Siberian Husky	Saint Bernard	Pekingese
Mixed Breeds	Boxer	Dalmatian	German Pointer

Data based on study of 206 dogs with OA. Breeds that presented in the highest numbers were placed in the higher risk category.

What is SYNOMAX and why is it good for dogs?

Synomax is a new and efficient solution for **supplementary therapy** of dogs suffering from joint disorders. It contains many essential bioactive substances in a special, synergistic combination, helping the optimal function of joints and connective tissues.

Unique composition:

The ideal combination of agents crucial to the health of joints.

- **Rebuilding cartilage:** Glucosamine sulfate, MSM, Collagen hydrolysate, Manganese,
- **Cartilage support:** Chondroitin sulfate, Harpagophytum procumbens, Hyaluronic acid
- **Antioxidant:** Vitamins A, E, and C
- **Has beneficial effects on inflamed and painful joints:** MSM, Harpagophytum procumbens, Boswellia serrata, Bromelain, Omega-3 fatty acid.

Liquid formula, better absorption, increased efficiency.

Absorption of active ingredients are significantly faster than in case of tablets, the beneficial effects appear sooner.

- **Easy application: greatly enjoyed taste** with easy administration from dispenser bottle.
- **Safe:** all ingredients are **natural**, suitable for life-long application.
- **Economic:** With average application a bottle of Synomax lasts for **110 days** for a 20 kg dog and **55 days** for a 40 kg dog.

How does **SYNOMAX** affect joint problems?

- Helps the joint's **flexibility and agility**
- Supports the **regeneration of cartilage**
- **Prevents the activity of enzyme inhibitors** that play a major role in joint damage
- **Reduces joint pain**
- **Reduces inflammation**, and swelling around the joint
- **Increases synovial fluid production**

What dogs do we recommend **SYNOMAX** for?

“ Owners are more willing to take care of their aging pets and to pay the costs of medical treatment ”

- **Senior dogs** – Degradation of joints can lead to pain and decrease in mobility of joints with time.
- **Dogs suffering from joint disorders** - to maintain flexibility of cartilage and increase mobility of joints.
- **Dogs under recovery** - additional treatment after **injuries, inflammation**, or specific **orthopedic surgical procedures** of the connective tissue (bone, cartilage, joint, etc.) and supplementary treatment of other joint disorders to shorten regeneration process.
- **Fast-growing, large breeds** - to improve general mobility and healthy development of bones, cartilage, and ligaments from puppyhood

synomax

Our **customer rating** is higher than 4.9 out from five star

Our Experiences

Without exception, dog owners who regularly give SYNOMAX syrup to their dogs notice **significant, positive impact** on movement and quality of life of their pets.

Check out our results!

- **Most of them have seen improvements in 1-2 weeks** in their dog's movement, but there were some, who only noticed changes after 3-4 weeks, or after a month.
- Most described a **"noticeable constant improvement"**, while some observed "significant and rapid improvement."
- The period of application was **1-3 months**, but often it was over 1 year.
- **99% of respondents recommend SYNOMAX** to others.
